

Attend the 2009 Orange County Tech Forum

In every economic cycle [Blue Violet Networks](#) understands there are winners and there are losers. During an economic downturn the stakes are higher - some organizations use this time to improve the efficiency of the IT system itself, and build competitive advantages.

In a recent survey, sixty-nine percent of respondents feel that in today's economic climate it is more important than ever to have good alignment between technology and the organization's business goals.

Organizations expect to exit the economic downturn with infrastructures that are cost-effective, optimized and efficient.

In its third consecutive year, the OC Tech Forum is the premier technology event in Orange County. It brings together industry experts, business professionals, decision makers and respected vendors focused on the latest and greatest technologies that will help your company gain a competitive edge in today's marketplace.

We invite you to [register today](#) and join us on November 5th, for a full day of educational and informative sessions. Please feel free to call (714)754-4000 or [email us](#) if you have any questions.

Applications And The
Benefits Of An Open
Architecture"

Watch the live presentation by conference speakers, Diana Kuykendall and Ed Lynch from [Blue Violet Networks](#). This presentation will begin at 10am. Stop by and say hello.

OC Tech Forum Lunch
From IN-N-Out

With the day filled with sessions, we thought it would be a good treat for the [In-N-Out Burger Cookout Trailer](#) to serve up lunch.
