

# Secure Your City Government

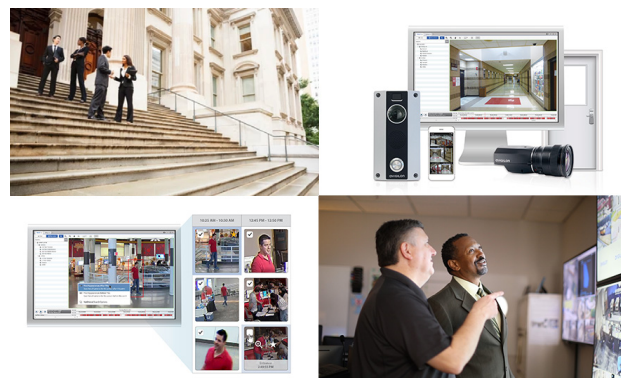

MOTOROLA SOLUTIONS

Many cities lack adequate surveillance or access control systems to safely monitor activity and manage the entry and exit of visitors, and staff. Complement city safety plans with state-of-the-art security systems to improve the safety of everyone and increase effectiveness of security resource officers. Reduce risks associated to city environments using weapons recognition and gunshot detection systems to immediately notify local police and electronically lockdown all doors in an emergency situation.

BlueViolet Networks designs and installs flexible, reliable and scalable solutions. From city buildings to police departments, our complete access control systems and integrated video surveillance will help keep your personnel and property safe. Security systems shouldn't take long to deploy and our highly-trained certified engineers will have you up and running in no time. We collaborate with you to design a new system or upgrade your current one to create a comprehensive solution that meets all requirements. Your team is trained on how to use and maintain the system — with no questions left unanswered.

- ✓ We helped improve the safety in the **City of Westminster** with video surveillance, decreasing theft and vandalism, and establishing real-time viewing for better quality video of government grounds.
- ✓ We deployed video surveillance city wide for **National Purple**, increasing safety city wide and ensuring real-time response and action.
